

ProfileXT[®] TEAM REPORT

Using the ProfileXT[®] to Work Better Together

One of the most significant benefits

of the ProfileXT[®] is the ability of a manager to know themselves and know each member of their department with a depth of information that only the ProfileXT[®] can provide. But knowing yourself and knowing your people is not enough; you need to use that information to maximize your working relationship with each member of your group as individuals and as a cohesive unit.

Compatibility among co-workers tends to make it easier for them to work together. But in the workplace, compatibility is not always achieved, and not always desirable. At the highest level in the company, different behaviors, talents, and disciplines are needed as they relate to functional roles (general management, sales, engineering, operations, etc...). Working with the various departments of an organization, you

will always find that you often need an individual's uniqueness to achieve desired results. Inevitably, "personality clashes" will occur. If not understood and addressed, these clashes can get in the way of productivity and even lead to dissension, which can have a negative effect on departmental success.

As a ProfileXT[®] customer, you have already identified the behaviors, talents, and disciplines that are essential to fulfilling, productive teamwork. **The ProfileXT[®] Team Report** will map out your team's characteristics scale by scale, providing you with the data you need to capitalize on both their similarities and their differences. The Team Report also provides you with detailed management suggestions, taking the guesswork out of how to manage your people individually and as a team.
